Forwarding mail to another email account automatically

NTInet lets you automatically forward incoming mail to another address, if you'd like.

Here's how to forward messages automatically:

1. Login to Webmail at (<http://mail.ntinet.com>)
2. Select “**Preferences**” from the left column.
3. Under “**User Settings** “ Enter the email address to which you want all your email automatically forwarded in the “**Forward To**” field.
4. Select “Save”
